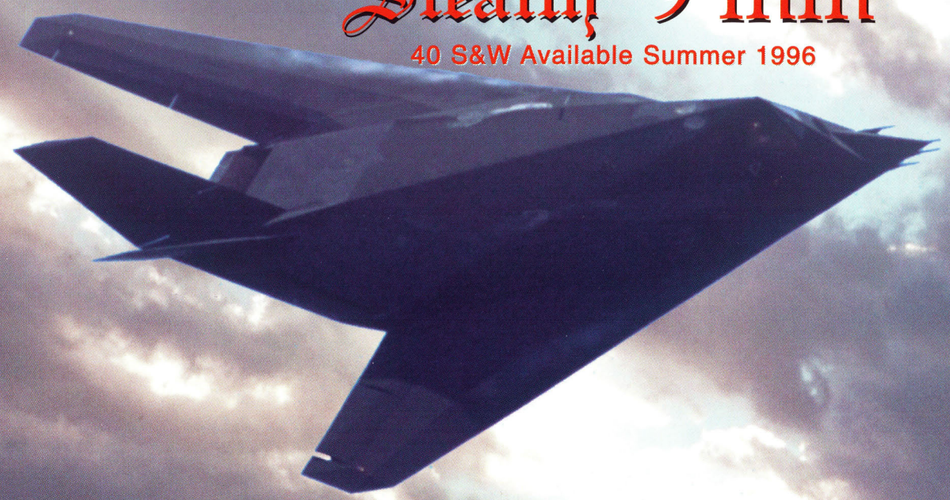
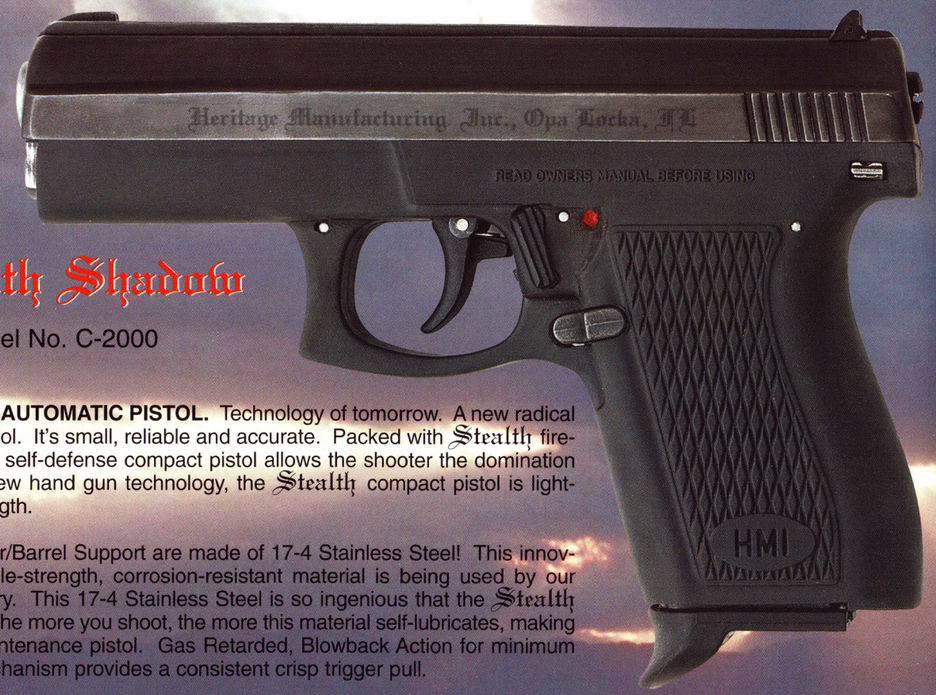
Stealth 9 mm

40 S&W Available Summer 1996





Stealth Shadow

Model No. C-2000

Stealth COMPACT SEMI-AUTOMATIC PISTOL. Technology of tomorrow. A new radical and provocative compact pistol. It's small, reliable and accurate. Packed with Stealth fire-power and performance, this self-defense compact pistol allows the shooter the domination of large calibers. Utilizing new hand gun technology, the Stealth compact pistol is light-weight with exceptional strength.

The Stealth Slide, Receiver/Barrel Support are made of 17-4 Stainless Steel! This innovative ultra strong, high tensile-strength, corrosion-resistant material is being used by our armed forces in heavy artillery. This 17-4 Stainless Steel is so ingenious that the Stealth pistol needs no lubrication. The more you shoot, the more this material self-lubricates, making the Stealth a very low-maintenance pistol. Gas Retarded, Blowback Action for minimum recoil. A Striker-Fire Pin mechanism provides a consistent crisp trigger pull.

The Stealth has 4 safety features for added safety. A Frame-Mounted Ambidextrous Trigger Safety is provided for quick release. Unseen to the shooter are 3 additional safeties incorporated in the design of the Stealth: a Magazine Disconnect Safety; a Closed Breech Safety and a Drop Safety.

The Stealth is manufactured using the most modern precision computer machined equipment and is built to exacting tolerances.

The Stealth has a hi-tech tough Black Polymer Frame available in 3 models:

C-1000 17-4 Stainless Steel Slide

C-1010 17-4 Stainless Steel Slide with Two Tone Black Chrome/Stainless Steel Side Panels

C-2000 17-4 Stealth Shadow Black Chrome Finish on 17-4 Stainless Steel Slide

Single Action Revolvers

* "Mother of Pearl" Birdhead Grip
Sold Separately

Rough Rider. An American Tradition. It has maintained much of the look and feel of the Single Action Army Revolver but scaled down to 22 long rifle and 22 magnum calibers. With new state of the art precision machinery, this historical revolver is more accurate and reliable. The **Rough Rider** locks up securely and has perfect timing to provide you with optimum accuracy. No short cuts are taken. The **Rough Rider** barrel is machined micro-threaded, then it is inserted into the Frame at a controlled depth. This regulates the barrel to cylinder gap and provides you with maximum power. Frame mounted hammer block with red indicator for extra protection. Brilliant nickel plated or lustrous blue finish. Exotic species hardwood grips.

Available in various lengths to suit your needs. Ideal for hunting or plinking.

Let this be your first recreational revolver! A great way to have fun with minimum expense. Attractively priced. American Quality.
